### **North Macedonia, Strengthening the Transmission Network in the South- east Region of North Macedonia - Component 1**

## **Stakeholder Engagement Plan**

March 2022

---

The Western Balkans Investment Framework (WBIF) is a financing facility launched in December 2009 by the European Commission, together with the Council of Europe Development Bank (CEB), the European Bank for Reconstruction and Development (EBRD), the European Investment Bank (EIB), Bilateral Donors, and Western Balkans countries with the purpose to deliver funding for strategic investment projects in beneficiary countries. Eligible sectors include infrastructure development in the environment, energy, transport, social and digital sectors as well as private sector development. KfW and the World Bank subsequently joined the Framework. In July 2017, the KfW became a partner organisation.

# 1. Introduction

## 1.1 Project Context

This document is Stakeholder Engagement Plan (SEP), and it was developed by Electricity Transmission System Operator of the Republic of North Macedonia (hereinafter referred to as "MEPSO") in order to clearly communicate to all interested and affected parties the stakeholder engagement program, which is to be implemented throughout the entire Project cycle.

The European Bank of Reconstruction and Development (EBRD) is considering providing finance to MEPSO from Republic of North Macedonia, to finance the project "Strengthening the transmission network in the Southeast Region of North Macedonia" (hereinafter referred to as "the Project"). The Project consists of two components as further described in Section 2 below. This SEP refers to the Project including both components, either individually or as a package.

This SEP describes the engagement activities being undertaken for the Project during planning, construction and operation. It has been prepared alongside the ESIA documentation, for the purposes of the Project.

This SEP also includes recommendations for stakeholder's engagement and information disclosure in relation to COVID-19.

## 1.2 Objective and Scope of the Stakeholder Engagement Plan

This Stakeholder Engagement Plan was developed by MEPSO in order to clearly communicate to all interested and affected parties the stakeholder engagement program, which is to be implemented throughout the entire Project cycle. The SEP identifies relevant stakeholders, defines communication channels and plans regarding the construction of the planned project.

The objective of this SEP is to improve and facilitate Project-related decision-making and create opportunities for active involvement of all stakeholders in a timely manner, and to provide possibilities for all stakeholders to voice their opinions and concerns that may influence Project decisions. The purpose of the SEP is, therefore, to enhance stakeholder engagement throughout the life cycle of the Project, and to carry out stakeholder engagement in line with the Macedonian laws, as well as the requirements of EBRD's [Environmental and Social Policy \(ESP\), 2019](#).

This SEP will be updated as necessary.

## 2. Project Description

### 2.1 Background and Project Objective

In order to meet the goals of the European Union for the integration of energy from Renewable Energy Sources (RES), North Macedonia makes efforts to maximize the integration of these energy sources into the national power system. Due to the favourable climate conditions, the investments in the RES (wind power, solar power and hydropower) are most cost-effective in the south-eastern region of North Macedonia. Therefore, it is expected that the most significant investments in utilization of RES are/will be located mostly in this region (Figure below).

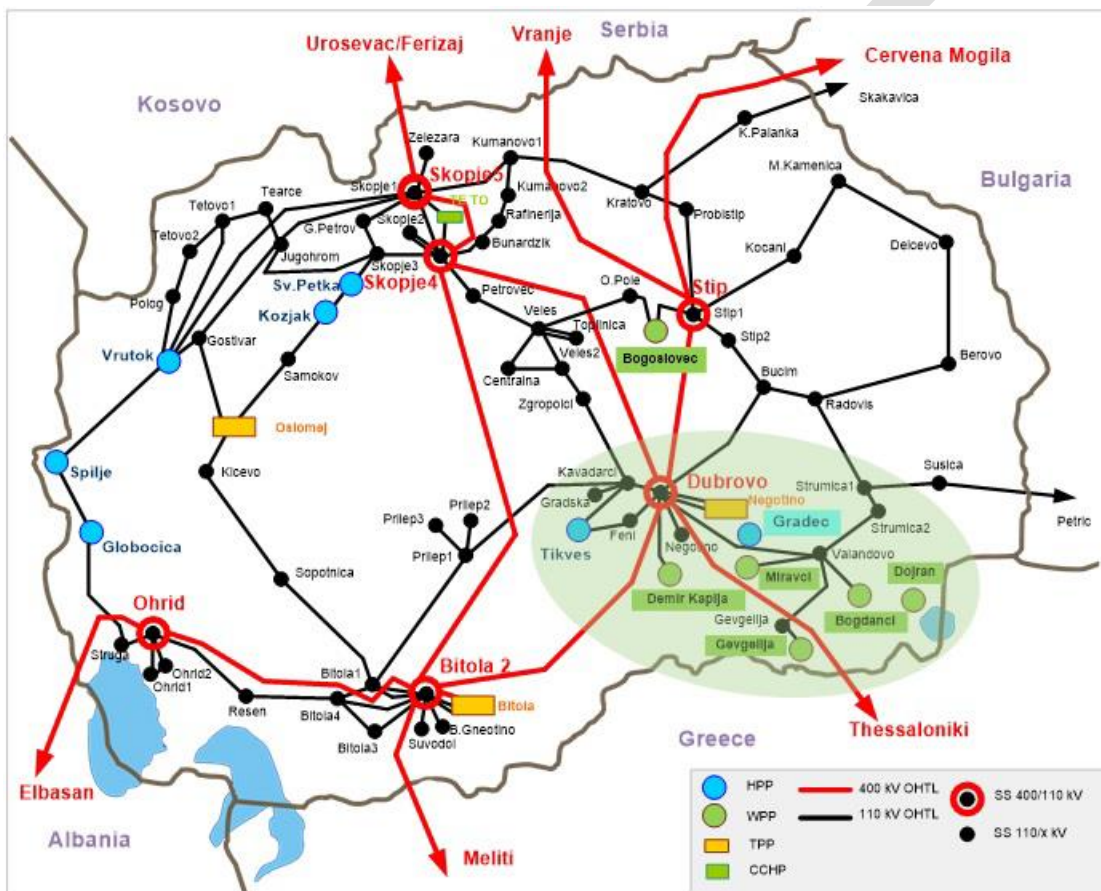

Figure 2.1: Macedonian grid and project area mid-term topology

Source: MEPSO

Note: The Project region is depicted in green pattern

MEPSO already faces several requests for new connections of RES in the local transmission grid in the wider Project region. Newly installed capacities of RES – wind power plants (WPP), big and small hydro power plants (HPP) as well as solar power plants (SPP) - up to 350 MW, are expected in a mid-term horizon in this region. In addition, new WPP - 536 MW, HPP - 185 MW SPP - 250 MW are foreseen until year 2040, in a long-term horizon.

Transmission grid in the southeast region of Macedonia (110 kV transmission line Dubrovo – Valandovo – Strumica 2 – Strumica 1, approx 57.5 km long line) is approaching the end of the lifecycle and lacks capacity for connection of new renewable electricity sources to the network. As such,

it is a candidate for reconstruction due to ageing process. In addition, in the midterm forecasted regimes, there are contingency cases with a higher risk to the security of supply.

The main objective of the Project is the strengthening the transmission network in the Southeast Region of North Macedonia. The Project is expected to provide:

- Increased security of supply, and
- Secure and reliable integration of planned RES in the southeast region of the country, which consequently contribute towards reduction in CO<sub>2</sub> emissions.

## 2.1 Project Components

The Project consists of the following two components:

- Design, construction and operation of a new 400/110 kV substation Miletkovo at approximate distance of 8 km from the existing 110/35 kV substation Valandovo, in the area of the village Miletkovo. This new substation will be connected with the existing 110 kV transmission network in the Project region and with the existing 400 kV transmission line Dubrovo – Thessalonica (GR), by in-out connection (Component 1 or Sub-project 1).
- Reconstruction of the existing 110 kV transmission line Valandovo – Strumica 2 – Strumica 1 by upgrading its transmission capacity (Component 2 or Sub-project 2).

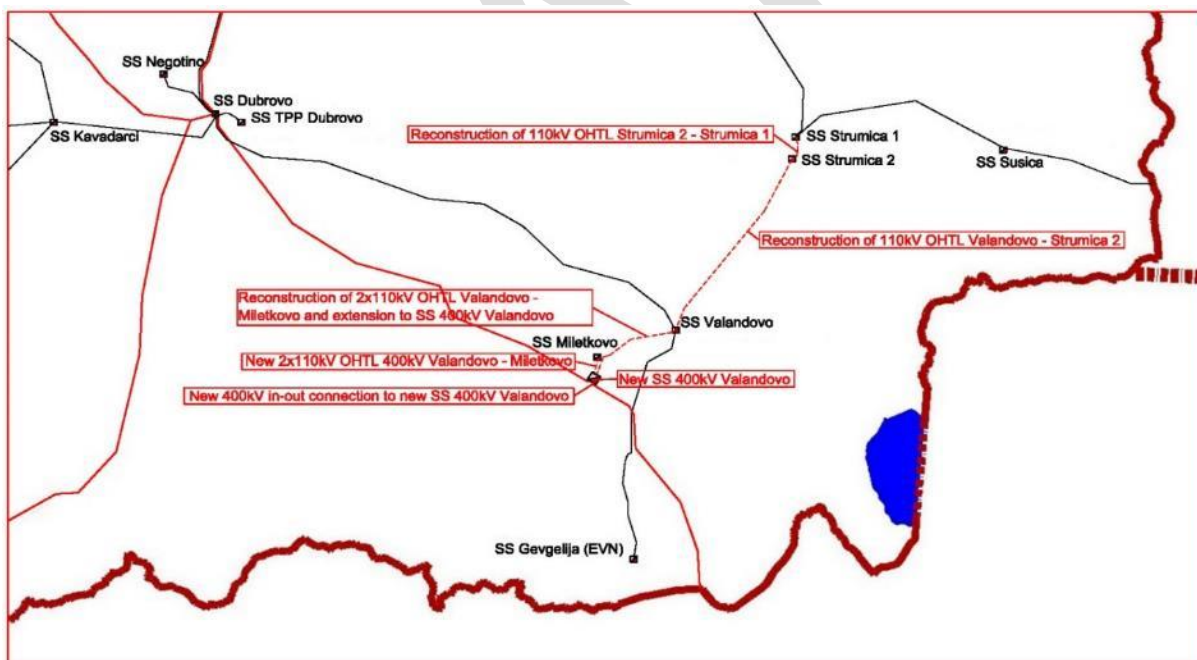

Figure 2.2: Elements of the Project

## 3. Regulatory Requirements for Stakeholder Engagement

### 3.1 National Legislation for Stakeholder Engagement

Requirements for public disclosure and consultation activities, related to preparation of project documentation and related strategic and other studies are covered under the following laws:

- Law on Spatial and Urban Planning<sup>1</sup> - regulates the system of spatial and urban development of Macedonia, including public information and participation throughout the process of development and adoption of urban and spatial planning documents.
- Law on Environment<sup>2</sup>. This law and its associated secondary legislation set out the requirements for undertaking environmental impact assessment (EIA) of potential environmental impacts of public and private projects which are likely to have a significant impact on the environment before development consent / construction permit is granted in the form of approval for project implementation.

In summary, the procedures for disclosure and consultations include the following steps:

- The public is informed about details of disclosure of the draft plan/document (where the hard copy is available for review, the dates and time when it can be reviewed) through the media and citizens/organizations are invited to send comments and/or attend public consultations;
- Public consultations are held in an appropriate local venue (e.g. city hall) and the plan/document is presented;
- Comments received from all stakeholders are processed and the plan/document is revised to reflect them. A report on which comments have been adopted and which have not, with a justification, is delivered together with the draft plan/document to relevant authorities who judge whether the comments have been meaningfully considered and addressed;
- All comments are responded to in written form.

The public has to be involved in every stage of the EIA procedure and all decisions made during the process must be published in the appropriate media, web sites of the relevant governmental bodies (national/local) and newspapers on the Macedonian language and the language of dominant ethnic community. The following documents will be publicly disclosed:

- Notification of intention for project implementation
- EIA Screening & Scoping Decision
- Announcement of Availability of the Environmental Impact Assessment Study (EIA Study)
- MoEPP Decision on granting consent to, or rejecting the application for the project.

Other applicable laws which foresee disclosure of project information or enable access to information, including mechanisms for grievances and appeals, include:

<sup>1</sup> Official Gazette of the Republic of North Macedonia, no. 32/20

<sup>2</sup> Official Gazette of the Republic of Macedonia, no. 53/05, 81/05, 24/07, 159/08, 83/09, 48/10, 124/10, 51/11, 123/12, 93/13, 187/13, 42/14, 44/15, 129/15, 192/15, 39/16 and 99/18

- The Law on Construction<sup>3</sup>
- The Law on Access to Public Information<sup>4</sup>
- The Law on Acting upon Complaints and Proposals<sup>5</sup>.
- The Expropriation Law<sup>6</sup>.

In 1999, North Macedonia signed up to the terms of the Aarhus Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters (1998). The Aarhus Convention grants the public rights regarding access to information, public participation and access to justice, in governmental decision-making processes on matters concerning the local, national and transboundary environment. It focuses on interactions between the public and public authorities.

## 3.2 EBRD Environmental and Social Policy

EBRD has set out a comprehensive set of specific Performance Requirements (PRs) that projects are expected to meet. PR 10 (Information Disclosure and Stakeholder Engagement) of EBRD's Environmental and Social Policy (ESP) 2019 emphasises the importance of an open and transparent engagement between the project, its workers, local communities directly affected by the project and other stakeholders as an essential element of good international practice and corporate citizenship. Stakeholder engagement involves stakeholder identification and analysis, stakeholder engagement planning, disclosure of information, consultation and participation, a grievance mechanism, and ongoing reporting to relevant stakeholders.

In accordance with PR 10, projects are required to develop and implement a Stakeholder Engagement Plan appropriate to the nature and scale of the risks, impacts and development stage of the project, and conduct stakeholder engagement on the basis of providing local communities that are directly affected by the project and other relevant stakeholders with access to timely, relevant, understandable and accessible information.

EBRD requires that project developers establish and maintain an effective grievance mechanism, ensuring that any stakeholder complaints and concerns are received, handled and resolved effectively, in a prompt and timely manner.

## 4. Stakeholder Identification and Analysis

Key stakeholders who are to be informed and consulted about the Project are:

- A) Affected or likely to be affected by the project (Project-affected parties); and
- B) May have an interest in the project (Other interested parties).

### 4.1 Stakeholder Identification

The following table presents the stakeholder identification and analysis of the approach for communicating these individual stakeholders.

Identified stakeholder	Specific issues or interests	Communication and engagement objective	Communication and engagement methods
<b>Project-affected parties</b>			
<p><b>Local residents:</b></p> <ul style="list-style-type: none"> <li>a) living in the project footprint whose property will be affected with project activities</li> <li>b) whose property will be affected with project activities, but living outside of the project footprint</li> <li>c) Whose paths of movement will be affected during the construction or during operation of the transmission line</li> </ul>	<p>Acquisition of property (Land, Crops and objects)</p> <p>Potential interest in health issues related to project</p> <p>Disruption of daily routine and paths of movement of people</p>	<p>Providing timely information on the need for land acquisition and resettlement, and alerting appropriate social and other relevant local authorities</p>	<p>Communication during the process of land acquisition and/or resettlement, within the possibilities.</p> <p>Online presentation materials.</p> <p>Media/press releases.</p> <p>Online social media (Facebook, YouTube, Instagram), Official website, Viber &amp; WhatsApp, other.</p> <p>Telephone calls.</p> <p>Direct email communication.</p> <p>Public and individual consultation meetings, if possible.</p> <p>Public announcement on visible public locations along the alignment (stores, schools, markets...)</p> <p>Disclosing information on the extent, timing and duration of planned works and any expected disruptions and inconveniences on the central bulletin board of the five affected municipalities, at least two weeks prior to the start of any construction works, and a week prior any significant change in the construction phase that is of particular interest to the local affected population</p>
<p><b>Businesses</b> that will be directly affected with the project and whose operation relies upon this project, either by and assets acquisition</p>	<p>Acquisition of property (Land, Crops and objects)</p>	<p>Providing timely information on risks and disturbances associated with the</p>	<p>Media/press releases.</p> <p>Online social media (Facebook, YouTube, Instagram), Official</p>

Identified stakeholder	Specific issues or interests	Communication and engagement objective	Communication and engagement methods
<p>process or by connecting to the grid.</p>	<p>Disruption of established routine and paths of movement of transport of workforce and materials</p> <p>Operational matters: integration into the grid</p>	<p>construction and operation period</p>	<p>website, Viber &amp; WhatsApp, other.</p> <p>Direct email communication.</p> <p>Public and individual consultation meetings, if possible.</p>
<b>Other interested parties</b>			
<p><b>General public</b> in the affected municipality and wider</p>	<p>Existence of Project related construction activities.</p>	<p>Providing timely information on Project benefits and risks</p>	<p>Online presentation materials. Media/press releases. Public consultation meetings, if possible. Online social media (Facebook, YouTube, Instagram), Official website, Viber &amp; WhatsApp, other.</p>
<p><b>Relevant government authorities, ministries and public institutions</b>, including:</p> <ul style="list-style-type: none"> <li>• Ministry of Infrastructure and Communication</li> <li>• Ministry of Finance</li> <li>• Ministry of Economy</li> <li>• Ministry of Environment and Spatial Planning</li> <li>• Ministry of Agriculture, Forestry and Water Economy</li> <li>• Ministry of Labour, and Social Policy</li> <li>• Ministry of Culture</li> <li>• State Labour Inspectorate</li> <li>• State Environmental Inspectorate</li> <li>• Ministry of Interior</li> <li>• Institution for Protection of Cultural Heritage</li> <li>• National Energetic Resources</li> <li>• Municipalities: Valandovo, Strumica, Gevgelija</li> <li>• Local Public Utility Companies in all three municipalities</li> <li>• Local museums</li> </ul>	<p>Issuing permits, consents and opinions in accordance with local legislation, control of compliance with local legislation</p>	<p>Consultations with relevant government authorities concerning Project activities in the framework of permitting procedures</p> <p>Reporting based on national legislation requirements</p>	<p>Online individual consultation meetings as necessary. Public consultation meetings, if possible. Direct email communication</p>
<p><b>Interested non-governmental organizations (NGOs)</b> <b>Environmental NGOs,</b> <b>Social Welfare NGOs,</b> <b>Other NGOs</b></p> <p>All organizations that have not yet demonstrated a specific interest in this Project, shall be provided with opportunities to voice their opinions or concerns throughout Project preparation and implementation.</p>	<p>Stakeholders of high significance for the Project's success which are interested in protection of the environment and human health</p>	<p>Providing timely information, communication and consultations</p>	<p>Online individual consultation meetings as necessary. Public consultation meetings, if possible. Direct email communication Media/ press releases</p> <p>Online social media (Facebook, YouTube, Instagram), Official website, Viber &amp; WhatsApp, other.</p>

Identified stakeholder	Specific issues or interests	Communication and engagement objective	Communication and engagement methods
<p><b>Note:</b> Any organizations interested in the Project can send their contact details to the PIU to be included in the Table of NGO/CSOs provided in Annex 4 of this SEP and notified directly about Project events.</p>			
<p><b>MEPSO employees</b> (and PIU), and relevant Trade Unions</p>	<p>Stakeholders of high significance for the Project’s success who are directly or indirectly engaged in Project planning and implementation</p>	<p>Providing timely information about the planned Project activities</p>	<p>MEPSO internal communication channels. Trainings as necessary.</p>
<p><b>Contractors</b> or subcontractors during construction, monitoring and supervision of works, and their employees, and maintenance related workers</p>	<p>Stakeholders of high significance for the Project’s success who are directly or indirectly engaged in Project planning and implementation</p>	<p>Provision of Project code of conduct and work safety and health regulations, environmental protection requirements</p>	<p>Information through tender procedure and contracts. Communication via supervising engineers. Toolbox talks at construction sites on health and safety topics. Monthly reports on progress of works to be submitted by contractors during construction works. Trainings. Email communication.</p>
<p><b>Businesses</b></p> <ul style="list-style-type: none"> <li>• Trade and Retail</li> <li>• Transport domain</li> <li>• Investors</li> <li>• Agriculture domain</li> <li>• other private sector stakeholders</li> </ul>	<p>Involvement in development of the project activities suitable to their needs and capacities</p>	<p>Informed businesses who will need to adjust their investments and operations to the planned outcomes of the project</p>	<p>Online individual consultation meetings, as necessary. Public consultation meetings, if possible.  Direct email communication.  Media/ press releases.</p>
<p><b>Donors and Other International and Supranational Organizations</b></p> <ul style="list-style-type: none"> <li>• The European Union</li> <li>• Western Balkans Investment Framework</li> <li>• Other</li> </ul>	<p>Stakeholders of high significance for the Project’s success who are directly or indirectly engaged and involved in project planning and financing of its implementation</p>	<p>Realization of the addressed support and finances</p>	<p>Direct email communication.  Media/ press releases. Online social media (Facebook, YouTube, Instagram), Official website, Viber &amp; WhatsApp. Public consultation meetings, if possible.</p>

Table 4.1: Stakeholder Analysis and Communication Requirements

## 4.2 Disadvantaged / Vulnerable Individuals or Groups

Disadvantaged / vulnerable individuals or groups are potentially disproportionately affected and less able to benefit from opportunities offered by the project due to specific difficulties to access and/or understand information about the project and its environmental and social impacts and mitigation strategies.

During assessments and preparation of this SEP, potential groups in the wide area around the project who might be affected by this project, differently due to their gender, age, ethnicity, religion

and other cultural, physical or other attributes (i.e. due to the digital divide, without internet access, rural areas, poor farmers), were examined. This assessment shows that there are no vulnerable or disadvantaged individuals in the project affected area that will be affected with the activities of this project and/or might require different channels of communication.

Hence, if MEPSO, during project implementation, identifies vulnerable groups affected by this project, it will be added to this SEP and appropriate communication methods will be identified and engagement activities will be conducted with this vulnerable group/s.

### 4.3 Gender Considerations

Gender considerations have been incorporated into the SEP and the future engagement methods. Engagement activities are designed to allow women to participate, i.e. focus groups and workshops. There are multiple methods for women to get involved in consultations and provide feedback on different aspects of the Project. Women will be consulted on the Project activities, further details on consultation methods are provided in Section 6 of this document.

DRAFT

## 5. Previous Stakeholder Engagement Activities

In order to ascertain appropriate project option and accordingly project design that will meet all business and IFIs requirements, as well as the requirements from technical aspects, MEPSO has started the consultation process with institutional stakeholders at an early phase.

In late September 2021, there was a serial of meetings with administration from the affected municipalities, as well as their local Public Utility Companies and local museums. The objective behind these meetings was the idea to present the Project, its components and activities that will be undertaken in this regard to the institutional stakeholders that will be affected the most and who can provide relevant information during the main design, as well as support for successful realization of planned project activities during the construction phase.

Additionally, online presentation to the institutional stakeholders on a national level (ministries) was conducted, following the Project presentations held with municipalities in live.

An overview of the stakeholder consultation process to date is given in Appendix 5.

DRAFT

## 6. Stakeholder Engagement Programme

### 6.1 COVID-19

The new situation with the outbreak of the pandemic COVID-19 disease, caused by SARS-CoV-2 virus, changed the familiar and widely used methods for information disclosure and stakeholder engagement.

In order to avoid, to the maximum extent where possible, the exposure to the risk of transmission of the infection, the stakeholder engagement and information disclosure methods for this project were tailored in accordance to the recommendations given by the most relevant international and national health organizations and relevant actors who are modelling and defining the good international industry practice (GIIP).

EBRD has published a good practice guide on [public consultation during the Covid-19 pandemic](#). A list of websites on public consultations and information disclosure in the COVID-19 times, as well as GIIP, is presented in Appendix 6.

### 6.2 Proposed Strategy for Information Disclosure and Consultation

For the Project's purposes, MEPSO will use different methods of stakeholder engagement approach in order to ensure continuous communication with all interested stakeholders and to make all necessary information available and accessible to the public. MEPSO, in cooperation with the affected municipalities, as well as local communities affected by the Project will ensure that local residents and businesses living or operating in the vicinity of the Project footprint are regularly informed about the Project development especially addressing start of construction activities and its impacts on the local residents and businesses.

In order to present the Project design and to inform the interested and affected stakeholders on the potential impacts and mitigation measures that are planned to be implemented in this regard, MEPSO will carry out public consultations and information dissemination that will reflect main issues of relevance to the Project in all three municipalities. If circumstances allow, these consultations will be held with physical presence (with full implementation of COVID 19 protection measures), otherwise online method and means will be used.

MEPSO will inform all stakeholders about the exact date, time and venue where and how the presentation will be held, at least 7 days in advance (but preferably 2 weeks), by disclosure through the social media, websites of the MEPSO and three municipalities, local media (newspapers, online news portals) and the bulletin boards of the municipality. The announcement of the online public meeting will also, be posted in the affected settlements, in order to specifically target the local population living in these communities. In addition, NGOs listed in Annex 4 to this SEP will be directly contacted and informed of the public disclosure event.

It is foreseen, also, a separate disclosure event to be held online where ESIA disclosure package shall be promoted and discussion upon it will be conducted live on available free communication platforms with the interested stakeholders and people who will register to participate.

An ESIA Public disclosure package for Project will contain:

- Non-technical Summary
- Environmental and Social Impact Assessment (ESIA),
- Stakeholder Engagement Plan (SEP),
- Environmental and Social Management Plan (ESMP),
- Project Grievance Form (see Annex 1)
- Land Acquisition Resettlement Framework (LARF).

All project promotional documentation will be published on [MEPSO](#) web site, and the web sites of [Municipality of Valandovo](#), [Municipality of Strumica](#) and [Municipality of Gevgelija](#). Documents will be prepared in English and Macedonian language and available upon their official approval. Documents will remain disclosed during a period of 30 calendar days. All interested parties can comment on the presented documentation for the given period of thirty days.

Documents will be also disclosed on the EBRD website during a disclosure period as required by the EBRD's Environmental and Social Policy and will remain publicly available throughout the life of the Project. All interested parties can comment on the presented documentation for the given disclosure period.

The presentation of the ESIA documentation for the project will be aimed at providing information to the public about the construction and operation of the planned motorway.

All justified comments and proposals will be considered and appropriately addressed. The PIU will publish a summary report of all relevant issues raised, including explanations for inclusion or exclusion of proposals.

All available Project information and documents will be disclosed to the public at least 2 weeks in advance of any planned presentation event. If necessary, separate online and individual meetings and direct communication will be held to ensure that the stakeholder engagement is gender and ethnic minority responsive.

A summary of all stakeholder engagement and disclosure requirements listed above is provided in Table below.

	<b>Activity</b>	<b>Timing/further detail</b>	<b>Responsibility</b>
1	Organise at least three online/in live public consultation meetings for Project Presentation to the public and non-institutional stakeholders.  Encourage written proposals and comments. Provide timely access to the documents before any meeting (at least 2 weeks)	Stakeholders will be informed about the exact date, time and venue where a meeting will be held, at least seven days in advance (but preferably 14 days), by disclosure through the websites of the MEPSO, local media and the bulletin boards of the Municipalities, as well as affected settlements. Registration for online meetings will be mandatory. NGOs listed in Annex 4 to this SEP will be directly contacted and informed of the online public meeting.	MEPSO/PIU
2	Ensure that the following Project documents are published on the websites of MEPSO and three municipalities: – This SEP – ESIA Study – Land Acquisition and Resettlement Framework – Project Grievance Form and Public Grievance Leaflet	All available Project information and documents will be disclosed to the public as soon as available, but at least 2 weeks in advance prior to the public meeting.	MEPSO/PIU

	Activity	Timing/further detail	Responsibility
	<ul style="list-style-type: none"> <li>– Non-technical Summary</li> <li>– Environmental and Social Management and Monitoring Plan</li> <li>– National EIA</li> </ul> Print and keep hard copies of documents at premises of MEPSO, and Municipalities of Valandovo, Strumica and Gevgelija.		
3	Organise individual consultation meetings	As needed or requested by the MEPSO, Municipality or by any identified stakeholder groups/individuals	MEPSO /PIU
4	Document all opinions, remarks and possible solutions with regards to the Project raised by stakeholders during consultation meetings, and address appropriately	Ongoing	MEPSO /PIU
5	Publicize information about the extent, timing and duration of planned construction works, and any expected disruptions and inconveniences via the websites of the MEPSO and affected municipalities	Two weeks prior to the start of MEPSO construction works	MEPSO /PIU
6	Publicise relevant information regarding project activities via the websites of the MEPSO and affected municipalities, as well as at the visible locations throughout the affected local communities	Weekly, during the construction period	MEPSO /PIU and Contractor

Table 6.1: Summary of Stakeholder Engagement and Disclosure Requirements

### 6.3 Future Project Phases

Throughout the life of the Project, MEPSO, PIU and the Contractor(s) engaged to undertake the Project will continue to engage with stakeholders and this Stakeholder Engagement Plan will be updated to reflect Project progress. The SEP will be updated annually and prior to construction commencing. Issues raised during the construction process will be documented and a response provided through the mechanisms described in this SEP.

Printed copies of ESIA public disclosure package will be available in MEPSO premises. In addition, printed copies of ESIA and relevant project documents will be available on construction site, the Contractor's office, upon beginning of construction works and the affected municipality.

During construction, Information Boards will be installed at the entrance of larger affected settlement by the main Contractor, and will serve as a media tool/channel for communications with the local residents. Information in relation to the Grievance Mechanism will also be included. The Contractor will secure sites prior to any construction activities taking place and will ensure appropriate construction and warning signs are in place.

All presentation materials, as well as relevant project documentation, will be available on the website of [MEPSO](#), during the lifetime of the project.

Any information regarding this project in the operational phase will be publicized on the MEPSO website, and social media it operates.

## 7. Resources and Responsibilities

A Project Implementation Unit (PIU) will be appointed by MEPSO which will be responsible for Project implementation, including implementation of the activities planned with this SEP. The PIU will incorporate necessary organizational structure, capacity and competencies, appropriate to the nature and scale of the Project and commensurate with the level of its environmental and social risks and impacts. The PIU will be in regular communication with EBRD.

For the purpose of effective realization of planned stakeholder engagement activities, the PIU will use its own financial means. The Contractor will be responsible for its own costs made on behalf of the required stakeholder engagement activities for this project.

A responsible person will be appointed by PIU for implementation of this SEP during the entire Project cycle, and in charge of communicating with the communities. Her/his contact information shall be updated if needed.

Contractor/s in charge of carrying out specific Project activities will also be required to implement the relevant provisions of SEP (for more details, see Chapter 6). The grievance mechanism requirements will be laid out in the tender documentation and contracts signed with the contractors.

DRAFT

## 8. Grievance Mechanism

MEPSO, on behalf of this project, will establish a grievance procedure whereas all stakeholders will be informed on grievance mechanism, contact persons from MEPSO responsible for implementation of grievance mechanism as well as the forms of submitting complaints.

Project Grievance Leaflet and Grievance Form (Annex 1) will be available on MEPSO and Municipalities (Valandovo, Strumica and Gevgelija) web sites and also in printed copies in the local MEPSO premises, as well as in premises of all three affected municipalities. In case if municipality receive grievances (in printed form or by e-mail) it will have to deliver those forms to MEPSO local project office within 3 days' period, who will immediately forward it to PIU for further processing. Additionally, any comments provided by stakeholders can be communicated personally or by telephone or in writing in the grievance form.

A Grievance Form may be also submitted to the Contractor in the stage of construction works. Grievance Leaflet and Form will be available on construction site on Macedonian language in printed forms whereas Leaflet will be hung on the construction site bulletin board in order to be visible to the public and interested parties. Contractor is obliged to forward all fulfilled grievances to the project's contact person in PIU.

All grievances will be recorded in a Grievance Registry (Annex 3) and acknowledged in 7 calendar day period. The stakeholder-complainant will be informed by MEPSO about proposed corrective measures and actions taken within 15 calendar days upon the acknowledgement of grievance. In case if MEPSO is not able to solve the issue or in case where action is not required MEPSO will provide explanation and justification to the complainant how to further proceed with the grievance in case if complainant is not satisfied with the outcome. Complaints can address other legal remedies in accordance to Macedonian national laws and regulations.

PIU will monitor the way in which grievances will be handled and keep recording the process in Grievance Registry including those delivered by the Contractor whereas the Registry will serve as a basis for completion of grievance management reports that will be included into the Annual Environmental and Social reports to the Bank.

PIU will publish and regularly update all relevant documents and grievance procedures on MEPSO website as well as provide hard copies of Grievance Forms to the affected municipalities. PIU will provide feedback to all stakeholders who fulfilled Grievance form by e-mail or mail. PIU will communicate with all relevant stakeholders and will inform them about any changes in the project dynamics where all updates will be published on MEPSO and municipality's web sites and provided leaflets to the local communities in the affected project area.

At all times, complainants may seek other legal remedies in accordance with the legal framework of Republic of North Macedonia, including formal judicial appeal.

All projects financed by EBRD shall be structured to meet the requirements of the EBRD [Environmental and Social Policy](#) which includes ten Performance Requirements (PRs) for key areas of environmental and social sustainability that projects are required to meet, including PR10 Information Disclosure and Stakeholder Engagement. In addition, EBRD's [Independent Project Accountability Mechanism \(IPAM\)](#) , as an independent last resort tool, aims to facilitate the resolution of social, environmental and public disclosure issues raised by Project-affected people and civil society organisations about EBRD financed projects among Project stakeholders or to determine whether the Bank has complied with its ESP and the Project-specific provisions of its [Access to Information Pol-](#)

[icy](#); and where applicable to address any existing non-compliance with these policies, while preventing future non-compliance by the Bank.

Contact information for enquiries and grievances:

Attention: Ms. Bisera Denkovska

Electricity Transmission System Operator of the Republic of North Macedonia (MEPSO)

Address: ul. Maksim Gorki 4, Skopje, North Macedonia

Tel: + 389 2 314 98 14

E-mail: [bisera.denkovska@mepso.com.mk](mailto:bisera.denkovska@mepso.com.mk)

A separate grievance mechanism will be available for workers.

DRAFT

## 9. Monitoring and Reporting

MEPSO together with local authorities from the three affected municipalities will be responsible for monitoring PIU implementing activities in the sphere of Project's Stakeholder Engagement, as well as communication channels, particularly with the PAPs<sup>7</sup>.

In order to summarize stakeholder engagement process, the PIU will prepare separate monitoring report (Stakeholder Engagement Activities Report) whereas the first report should be produced six months upon start of the Project construction activities and will be continued on a semi-annual basis until completion of construction works. After Project completion PIU will develop annual Monitoring report during the operation phase. Monitoring reports should contain information about:

- Consultation meetings with stakeholders (place, time, issues discussed, mitigation measures provided by PIU)
- Grievances identified in the reporting period (and all detailed information about it)
- PIU will also report on stakeholder engagement activities (on annual basis), to the EBRD and WBIF.
- Each Stakeholder Engagement Activities Report for this Project will be published on the MEPSO web site for public review and further comments.

PIU will invite external monitoring by interested NGO/CSO in the local area to monitor implementation of SEP activities.

Indicators to be monitored during SEP implementation are:

- All stakeholders are communicated prior project activity starts.
- Dissemination of information – availability and accessibility of Project documents; frequency of distribution of information, reached stakeholders;
- Realization of planned engagement activities – the number and level of participation by specific stakeholder groups;
- Number of vulnerable groups identified and communicated
- Minutes of meetings created;
- Correction actions delivered;
- Numbers and type of grievances
- Compliance with the grievance mechanism – Completed records in grievance log (Annex 3)
- Percentage of grievances resolved within prescribed timelines
- Number of repeated grievances.

---

<sup>7</sup> PAP - Project Affected Person: Person (whether natural or legal) experiencing either physical or economic displacement
